DETAILED ACTION

Claims 1-97 are pending.

Election/Restrictions

Claims 1-97 are generic to a plurality of disclosed patentably distinct species comprising piperazine species, pyrimidinyl species (claims 30-39, 41-42, 45-55, 73-85) pyrazinyl species (claim 44) pyrimidinyl species (claim 40) and various other species generically claimed. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Each of these species is independent and distinct. Searching each of these cores along with the various methods of uses would be serious search burden, as each controlling core including those positively recited and generically recited has to be classified and searched.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Nicholas Triano on 10/14/2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
